

Summer Opportunities *...for High School Students*

Here is a list of various academic enrichment programs offered for high school students. Click on the links below to access their websites. If you are wondering about the cost, a good reference is about \$1000 per week for residential programs. Some camps costing less than \$1000 per week are indicated in **green**, while some camps with stipends are indicated in **red**.

Please note: These links and resources are listed for informational purposes and convenience. No direct or implied endorsement by Fairview High School should be construed. Additionally, the companies that offer summer programs would like you to believe that attendance will increase your student's chances for acceptance at certain colleges, or will improve their odds of landing certain jobs. Do not assume that these summer programs are as helpful or selective as some solicitations from their founders may imply.

To get a firmer sense of how engaging a program may be for your student, you may want to ask the company for the contact information of someone in Colorado who has attended their program recently. In addition, to read comments from other parents about various summer programs, click on this [link](#) to an open forum on the subject.

What People Say About Summer Enrichment Programs (Links to articles)

- [College Discussion](#)
- [Parents Forum](#), you can search a topic like Summer Programs etc. to find a discussion.
- [Summer choices](#) are a chance to tell colleges who you are.
- [Which on-campus summer program to choose?](#)
- [How to spend your summer and prepare for college](#)
- [Going to Summer School](#), the summer program section in this article is displayed below.

"Many parents figure that shelling out for a summer enrichment program at an elite college will get their child's foot in the door. Harvard and Yale, for example, both charge about \$1,000 a week. But earning a couple of A's at Harvard's summer program won't give your child the inside track to a freshman dorm room on Harvard Yard. An easier and cheaper option is to enroll in a summer college class near your home. The key is to show your interest in learning, advises the father and son team of college consultants, Howard and Matthew Greene. Where you do it isn't important."

"You don't necessarily need to spend the summer with your nose in a book, but you do need to put your summers to work by pursuing activities that display drive and initiative," advises Katherine Cohen of IvyWise to high school students. "Colleges are mainly looking for what we call 'angular' kids," she says. "They're not looking for well-rounded students; they're looking for well-rounded student bodies. So in order to position yourself as an angular kid, you have to highlight those one or two passions, interests, strengths and run with them," Greene agrees. "The well-rounded kid at the most selective colleges doesn't tend to do as well," he says. Elite colleges "are more focused on putting together a class made up of a bunch of individuals with very specific talents."

Science

- [National Youth Science Camp \(NYSC\)](#) - official site for the intense month-long program for young scientists the summer after they graduate from high school.
- [Michigan Math and Science Scholars](#) - designed for high school students interested in mathematics and science, providing an intensive and supportive setting to preview studying these subjects at the college level.
- [Summer Science Program](#) - exposes selected high school students to advanced topics in mathematics, astronomy, and computer science. Includes telescope observations to calculate an asteroid's orbit.
- [Stanford University - Quest Scholars Program](#) - summer residence program for gifted, low-income, underserved, predominantly minority high school juniors and seniors who are concerned with the environment.
- [Science Adventures](#) - offers science day camps, after school programs, and school assembly programs for K-6 kids.
- [Pennsylvania Governor's School for the Sciences](#) - provides instruction to talented PA high school students in the discrete sciences, mathematics, and computer sciences, with emphasis on hands-on laboratory research.
- [NASA SHARP \(Summer High School Apprenticeship Research Program\)](#) - a paid research-based summer mentoring program for talented high school students. Administered by MTSI.
- [Brandeis Summer Odyssey](#) - offers summer academic programs, including scientific research and college credit courses, for grades 10-12.
- [Summer Days Math and Science Camp for Girls](#) - week-long educational experience for girls held on Maryland's Eastern Shore.

- [Scitech](#) - summer science research program for high school students at the Technion.
- [Science Outreach](#) - interactive workshops and summer science and engineering camps for kids, run by undergrads at the University of Toronto.
- [Whale Camp, The](#) - one- to four-week summer program for kids to explore marine biology research and the art of navigation. Also offers a one-week program for teachers.
- [Acadia Institute of Oceanography](#) - offers marine studies for ages 12-18. Environmental education studies tidepools, beach and ocean ecology including whales, seals, and seabirds.
- [Destination Science](#) - summer day camps revolving around central science themes such as technology, physics, and space. With locations in Northern and Southern California.
- [Ocean Educations Ltd](#) - offers a three-week summer program providing SCUBA certification and a high school credit in senior level marine and environmental science in Victoria, British Columbia.
- [California State Summer School for Math & Science \(COSMOS\)](#) - residential academic enrichment program at University of California, Davis for high achieving math and science students completing grades 8-12.
- [Science Venture](#) - science and engineering summer day camp for kids based at the University of Victoria during July and August. Lots of hands-on projects.
- [Sally Ride Science Camp](#) - overnight science camps for girls entering 6th-9th grade. Based in Stanford, CA and Atlanta, GA.
- [Science in the Summer](#) - science education programs for elementary school children, held in Philadelphia-area libraries.
- [SCI-FI](#) - engineering and science summer camps for grades 4-9 at the University of Saskatchewan.
- [BlueAcademy Ocean Experience](#) - offers a nonprofit summer marine science programs on Yanuca Island for high school students.
- [Baylor University High School Summer Science Research Program](#) - residence program providing high school juniors with hands-on research working on projects with Baylor professors. Includes seminars, field trips, and recreational activities.
- [Student Science Enrichment Program \(SSEP\)](#) - summer and year-round science internships and camps for middle and high school students. Site offers science games and activities for students, lesson plans and resources for educators.

Space, Astronomy & Aviation

- ** [MITES: Minority Introduction to Engineering Entrepreneurship and Science](#)

- MITE²S (Minority Introduction to Engineering, Entrepreneurship, and Science) is a rigorous six-week residential, academic enrichment summer program for promising high school juniors who are interested in studying and exploring careers in science, engineering, and entrepreneurship.
 - [NASA SHARP Program](#)
 - Sponsored by the National Aeronautics and Space Administration (NASA), the Summer High School Apprenticeship Research Program (NASA SHARP) is designed for students who have demonstrated a strong interest in and aptitude for science, technology, engineering and mathematics (STEM).
 - [National Youth Science Camp](#)
 - The National Youth Science Camp is an intense month-long camp for young scientists the summer after they graduate from high school. In a rustic setting, students from around the country are challenged academically in exciting lectures and hands-on studies, and have many opportunities to push themselves physically in an extensive outdoor program, gain a new and deep appreciation for the great outdoors, and establish friendships that last a lifetime.
