Is This Program Right For You?

If you like working with computers, playing video games, designing games, and building web pages, then this is the program for you!

In Internet and Game Applications, we design Flash games, play games, learn XNA coding for X-box, and learn all about web design. To be a good web designer, you need to know how to work in Flash, Fireworks, and Dreamweaver! You will learn how to integrate all of these programs together in this class.

Join us for fun, hands-on manipulation of technology and leadership skills in computers that will be vital to you in your future.
